

EAVE N FLOW ELITE[®]

Drop Pattern Gutter Guard

EAVE N FLOW ELITE[®] - PERFORATED GUTTER GUARD

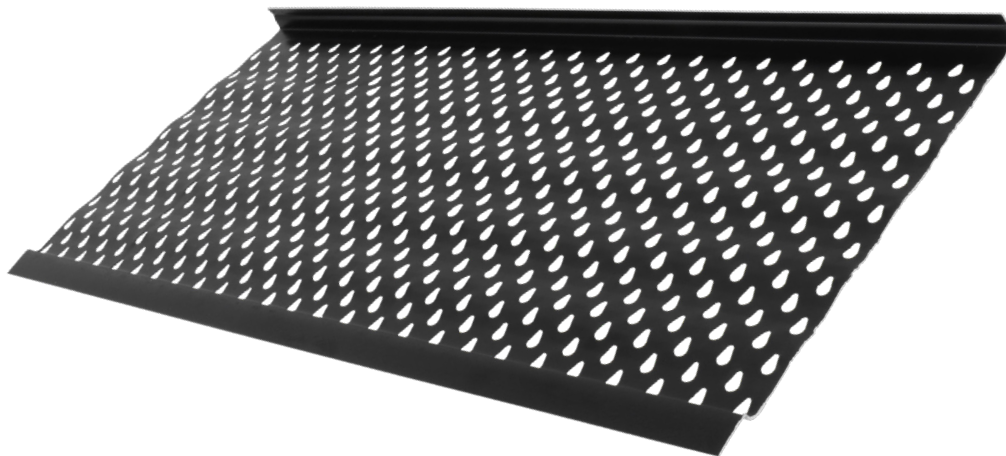

Senox is proud to introduce its newest line of perforated gutter guard: Eave N Flow Elite[®]. This newly re-designed product features a number of significant improvements including unique raindrop shaped perforations which relieve surface tension and provide superior water flow compared to similar perforated products with round holes.

Manufactured in Texas by Senox, Eave N Flow Elite[®] is made from roll formed, painted aluminum, and is currently available for 5" & 6" K-Style in both black and (all new!) white versions

Profile Improvements

The new Eave N Flow Elite[®] has been redesigned to feature a much shallower depth profile in order to prevent leaf and debris accumulation once installed. The front lip of the gutter guard has been updated to include a slight downward radius so it rests firmly on the lip of the gutter. Additionally, the pilot holes have been removed from the lip in order to prevent any water seeping through that may otherwise cause tiger striping on the front of the gutter.

DROP PATTERN

Perforations

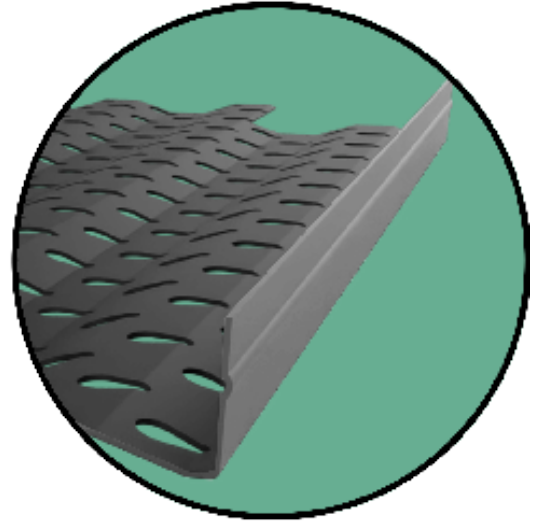

Available Profiles:

Eave N Flow Elite® HB (High Back)

The Eave N Flow Elite® HB, or 'High Back' profile is designed for applications where the installer wishes to screw the back of the gutter guard into the fascia board during installation. The 7/16" tall back has a grooved bead running the full length of the product to help with screw placement and provide additional strength. Works with all Senox Hangers.

Color Selection:

Black or White painted aluminum

| Part Number | Description |
|-------------|--|
| 3915050001 | GUTTER GUARD, EAVENFLOW ELITE® HB, 5" X 4', K, WHITE |
| 3915050004 | GUTTER GUARD, EAVENFLOW ELITE® HB, 5" X 4', K, BLACK |
